Games For Girls

Games For Girls

DOWNLOAD

Games for Girls is a free collection of six wonderful games inside one app These games run on HTML5 technology so they need a powerful Android device.. I would recommend dual or even better, quad core processor, running at 1 2Ghz or better, with 1gb of ram (or more).. Let me tell you about each game: Memory Art: Memorize the flashing colors on the art palette, in the right order! Pukki Pet: Take care of Puki, the playful puppy pet: Play and feed it!.
